

Asteria Labs

Brief description:

Asteria Labs specializes in advanced materials research and development, focusing on innovative solutions for a sustainable future.

Industry:

Materials Science

Products:

Smart Coatings, Biodegradable Plastics, Energy-efficient Insulation

Sensitive projects (names & general descriptions):

1. Project Nova Development of a new class of biodegradable materials that can replace conventional plastics.
2. Quantum Coating Initiative Research on smart coatings that adapt to environmental conditions for enhanced durability.

Partners:

EcoMaterials Corp, GreenTech Innovations, Future Energy Solutions
