

HelixSense

Brief description:

HelixSense specializes in advanced sensor technology and data analytics to enhance environmental monitoring and smart city solutions.

Industry:

Technology

Products:

Smart Sensors, Data Analytics Software, Environmental Monitoring Systems, IoT Solutions

Sensitive projects (names & general descriptions):

1. Urban Air Quality Monitoring Developing a network of sensors to monitor air quality in urban areas to provide real-time data for city planners.
2. Smart Waste Management Creating an intelligent waste management system that utilizes sensor data to optimize collection routes and schedules.

Partners:

City of Metropolis, GreenTech Innovations, EcoData Solutions
