

Marina Quantum

Brief description:

A leading innovator in quantum computing solutions, focusing on marine applications and environmental sustainability.

Industry:

Technology

Products:

Quantum Computing Platforms, Marine Data Analytics Software, Environmental Monitoring Systems

Sensitive projects (names & general descriptions):

1. Oceanic Quantum Simulation Developing quantum algorithms to simulate oceanic currents and climate patterns.
2. Marine Biodiversity Mapping Utilizing quantum computing to enhance the accuracy of marine biodiversity assessments.

Partners:

OceanTech Innovations, GreenWave Solutions, Quantum Research Institute
