

Orion Grid

Brief description:

Orion Grid specializes in advanced energy management solutions, focusing on smart grid technology and renewable energy integration.

Industry:

Energy Technology

Products:

Smart Grid Software, Energy Analytics Platform, Renewable Integration Solutions

Sensitive projects (names & general descriptions):

1. Grid Resilience Initiative A project aimed at enhancing the resilience of energy grids against natural disasters.
2. Distributed Energy Resource Management Development of a platform for managing and optimizing distributed energy resources like solar and wind.

Partners:

EcoPower Solutions, GreenTech Innovations, Future Energy Corp
